## Education

**ABV-IIITM Gwalior**                                               Aug 2023 - Present
*Integrated B.Tech and MBA in Information Technology*

**RGUKT Basar**                                                    Jan 2020 - Sept 2022
*Pre University Course (PUC)*

## Experience

**Web Developer**                                        Basar, India *Feb 2023 –*
*Alumni Talks*                                                          *Mar 2023*

- Developed a landing page for Alumni Talks, focusing on a clean and responsive design to engage users and provide relevant information about the platform.
- Implemented authentication system allowing college students and alumni to securely log in using their college email addresses, ensuring data privacy and a smooth registration process.

## Projects

**Blogsy - Blogging Web Application**                                    ○ ↗

- Developed a fully functional blogging platform with user authentication (email/password & OAuth via Google) using Passport.js and Mailtrap for secure OTP-based email verification and password reset.
- Designed and implemented CRUD operations for blog posts, allowing users to create, edit, delete, and comment on blogs, with features for blog tagging, image uploads, and dynamic user interactions.
- Utilized MongoDB with Mongoose for data storage and implemented back-end functionality for blog and comment management, leveraging tools like multer for file uploads and Git for version control.
- **Tech Stack: Ejs, Node.js, Express.js, Passport.js, and MongoDB.**

**EasyStay - Hotel Booking Web Application**                            ○ ↗

- Developed a responsive user interface using Tailwind CSS and shadcn/ui to provide a consistent experience across mobile, tablet, and desktop devices, allowing users to browse, view, and interact with hotel listings efficiently.
- Implemented back-end with Node.js and Express.js for efficient data management, with MongoDB as the database, handling user information, bookings, and room listings.
- Designed and implemented booking functionality, allowing users to book places with real-time availability and confirmation, streamlining the booking process for a better user experience.
- **Tech Stack: React.js, Tailwindcss, Node.js, Express.js, jsPdf, and MongoDB.**

## Skills

**Languages:** C, C++, JavaScript, TypeScript, SQL

**Database systems:** MySQL, MongoDB, PostgreSQL

**Frameworks:** React.js, Next.js, Node.js, Express.js, React Native, Tailwindcss, Bootstrap

**Tools:** Git, Github, Postman, Netlify, Vercel, WebStorm, Remix, Vite

## Certifications

**Web Development Bootcamp**                                              *Udemy*

**Frontend Developer (React)**                                       *HackerRank*
